

# Macro and Markets Dashboard: United States

Updated: June 14, 2017

First quarter U.S. economic growth slowed from lower consumption spending growth, despite an improvement in exports. The unemployment rate is gradually nearing its long-run full-capacity level. Inflation is around two percent in both the core CPI and the full index, with no expected acceleration. Elevated consumer confidence and P/E ratios, with near long-term low equity market volatility, show an extraordinary level of optimism. The yield curve for government debt has flattened while the dollar remains strong.

## Economic Growth and Employment

### Real Gross Domestic Product (GDP)

(Quarterly percent change, seasonally-adjusted annual rate)

### Civilian unemployment rate (percent)

Unemployed and looking for work (U3 rate)
